

Driver Risk Management Services

Hello

I'm Adrian Hide, a road safety specialist with over 30 years' experience in driver risk management. I've worked in both the private and public sectors and I'm passionate about making travel safer on our roads.

What I do

I help you to understand your duty of care obligations under Health & Safety law and then work with you to set up and manage a driver risk management programme that's right for your business and one that meets your legal obligations.

Why I do what I do

Sadly, more people die because of a road collision than for any other work-related activity. In fact, over a quarter of all collisions involve someone who was driving as part of their work at the time of the incident. It's not only a legal requirement to manage driver risk; it's also the right thing to do. It's all about protecting people, the business, their brand and their reputation.

How I can help

Every business is different, so my approach is flexible but thorough. For SMEs I offer a cost-effective Managing Work-Related Road Safety Toolkit, for larger businesses, I adopt a more bespoke and consultative-led approach.

Driver Risk Management for SMEs

My Driver Risk Management Toolkit, ideal for SMEs, has three options. Essential and Essential+ contain everything you will need to fulfil your duty of care requirements. I provide the templates and resources; you simply edit a couple of documents to suit your business needs and operational preferences. It's a kind of DIY option, but with full instructions in a 'How To' guide.

Platinum is ideal if you would prefer a more hands-on approach by me, freeing you up to work on your business.

Whichever one you chose, the end results are the same, a good Driver Risk Management Programme, it's just the method by which you get there is different.

Driver Risk Management for larger companies

This is a more bespoke service and your initial engagement with me starts with a discovery meeting, just to establish whether I can add any value to what you already do. If we both feel there is, you could invite me in to conduct a full review of your arrangements for managing driver risk in your business. I'll benchmark you against the Health & Safety Executives guidelines and that of industry best practice.

You'll then receive a comprehensive report highlighting my insights, recommendations and a suggested action plan. How you engage with me beyond this stage is flexible. You might have the resources and expertise in your business to implement my recommendations or, you might like the support that comes from having a virtual Driver Risk Manager in your business.

Training services

- e-learning based driver training courses
- Workshop-based driver safety awareness
- On-road eco-safe driver development
- Line Manager training
- Minibus driver assessment and coaching programme

Support services

- Innovative smartphone-based driver safety app
- Automated driving licence checking service
- Driver & Vehicle Information Management system

Does this sound like you?

If you recognise that driving is a high-risk activity and want to reduce this risk, ensure that you are meeting your Duty of Care obligations, protect your business, its reputation and above all, put people first, then I'd love to hear from you.
